

13th National Colloque on Diabetes and Nutrition

« Diabetes Morocco 2024 »

Faculty of Medicine and Pharmacy,
July 5 and 6, 2024 in Agadir

Prof. Jamal BELKHADIR

President of the Moroccan League for the Fight against Diabetes
Former President of the International Diabetes Federation MENA Region

Dear friends,

In collaboration with the Faculty of Medicine and Pharmacy of Agadir, the Moroccan League for the Fight against Diabetes is organizing with its partners the 13th National Conference on Diabetes and Nutrition, Diabetes Morocco 2024, on July 5 and 6, 2024 in Agadir.

This event will be organized, as usual, in collaboration with the various departments of the Ministry of Health, the Ministry of Higher Education,

Scientific Research and Innovation, the National Council of the National Order of Physicians, of the International Diabetes Federation Region MENA, WHO, CNOPS, ANAM, the Moroccan Society of Medical Sciences, the Moroccan Society of Endocrinology Diabetology and Nutrition, the Moroccan Society of Nutrition, Health and Environment, Ibn University Tofaïl, from the “AVIESAINE” association and the AFRA/IAEA Designated Regional Nutrition Center (Ibn Tofaïl University – CNESTEN).

The Congress program, spread over 2 days, will bring together Moroccan and international experts from different countries. It will allow participants to follow the latest news in Diabetology and Nutrition.

The debates will also focus on the place of metabolic diseases in basic medical training in Morocco as well as on our health system which is undergoing a profound overhaul with the generalization of health insurance and improved access to care. The diabetic care pathway is approached in particular from the perspective of the specialist doctor/family doctor relationship.

During the COVID19 pandemic, we organized all our scientific and social activities virtually. This year we are returning to the mode of face-to-face meetings and we have chosen the city of Agadir, the pearl of the Souss Massa-Draa Region, which is experiencing unprecedented medical and scientific development.

On this occasion, we would like to warmly thank our friend Professor Abdelmjid CHRAIBI, Dean of the Faculty of Medicine and Pharmacy of Agadir for his fruitful collaboration in the organization of this event at the level of this young and dynamic Faculty of Medicine and of Pharmacy. We are very pleased that this congress coincides with the defense of the first theses to obtain the doctorate in Medicine of the laureates of this Faculty.

Finally, we would like to reiterate our sincere thanks to all those who continue to provide their support for the success of the League's activities in the fight against Diabetes and Non-Communicable Diseases.
