

Celebration of World Diabetes Day 2021

Chronic Disease Care Center

Oujda, December 4th, 2021

As part of the celebration of **World Diabetes Day 2021**, the **Moroccan League for the Fight against Diabetes** organized, with its partners, a Diabetes screening campaign on December 4th, 2021 in Oujda, at the **Chronic Disease Care Center**

On this subject and under the Presidency of **Mr. Wali of the Region**, the Moroccan League for the Fight against Diabetes, paid during the inauguration session, a vibrant tribute to the efforts of the various partners in our country for the fight against diabetes and its complications including diabetic retinopathy.

Likewise, **the Moroccan League** team supported the efforts of the **Lions Club and its partners**, in particular **the Ophthalmology team of the Mohammed VI University Hospital of Oujda** for the screening and management of diabetic retinopathy (equipment and training of staff from several Centers in the Oriental Region).

A big thank you also to the team of **Chronic Disease Care Center**, which with great dedication and organization, rightly represents a true Reference Center for diabetes in our country.
